

Frederique Constant Worldtimer FC-718WM4H6
£2,650.00

We are delighted to be able to offer this rare Frederique Constant accompanied by its inner box and papers dated 2013 in addition to our 12-month warranty.

This Frederique Constant Worldtimer, model FC-718WM4H6, features a 42mm stainless steel case a domed polished bezel, a mesmerizing world atlas dial with dotted hour markers, date wheel at 6, an exhibition case back and a sapphire crystal glass. The point of focus on this timepiece is indeed the dial which as the company suggests is intended for exploration and travel and can be used to read, instantly, the exact time in the 24 cities representing the 24 reference time zones – with, the added bonus of an immediate indication of which of them are currently experiencing night or day.

The watch operates from an automatic movement, caliber FC-718, providing this timepiece with a power reserve of up to 42 hours.

The Worldtimer is currently fitted to generic black leather two-piece strap with a pin buckle. We are currently waiting for a brand new strap to be supplied directly by Frederique Constant.
