

**Omega Constellation Double Eagle 1513.30.00**  
**£1,995.00**

This Omega Constellation Double Eagle could quite possibly be the finest example around! Quartz battery powered its a complete full set of box and papers dated to 1998 by the serial number.

Just through our workshop for a battery change and then on to our polisher considering this watch is over 25 years old is in excellent all round condition.

38mm steel case (feels and appears much more like a 40mm) makes this watch out in size, its fitted to its original steel bracelet with plenty of links to fit a wrist to 17.5cm. (double fold clasp).

Considered waterproof to 100 meters with sapphire crystal.

Silver sunburst effect with baton hour markers in silver that match the hands make this an understated watch. Date window aperture to '3'.
