Price: £2950.00

Cartier Roadster 2510 | Discontinued | Silver/Grey Concentric Dial | Automatic | 12-Month Warranty

This discontinued Cartier Roadster 2510 is a superbly maintained example of a truly distinctive watch, now increasingly hard to find, especially with the rare silver and grey concentric dial. It is offered in excellent working order and condition, housed in a Cartier travel pouch and covered by our 12-month in-house warranty.

The 37mm barrel-shaped stainless-steel case is fitted with an automatic Cartier movement and a sapphire scratch-resistant crystal. With its 30m water resistance, it's suitable for everyday wear, while still retaining that unmistakable Cartier elegance.

The bracelet features a quick-release system, making it easy to switch to a leather or rubber strap if desired. It currently fits wrists up to 17.5cm and is paired with a signed Cartier stainless steel bracelet and double-fold hidden clasp.
