

Vivid Green Emerald & Diamond Drop Earrings **£20,000.00**

A striking pair of earrings showcasing two exquisite pear-shaped natural emeralds, weighing 2.36 ct and 2.63 ct respectively. Certified by GRS Swisslab, each emerald displays a vivid green hue – the most desirable colour in emeralds – and is accompanied by minor to moderate clarity enhancement, consistent with fine quality stones.

The emeralds are set within a halo of brilliant-cut white diamonds that trace their elegant teardrop shape, adding brilliance and contrast to the rich green centres. The design continues with a diamond-set loop and hoop, allowing the earrings to catch the light beautifully with every movement.

Crafted in precious white metal, these earrings combine timeless elegance with the rare allure of Colombian emeralds, making them a statement piece for both evening wear and special occasions.
