

**Omega, Swatch Moonswatch "Mission to Neptune" £400
£400.00**

Swatch x Omega MoonSwatch “Mission to Neptune” | 42mm | Bioceramic | Full Set

The MoonSwatch “Mission to Neptune” is one of the most sought-after models in the acclaimed Swatch x Omega Bioceramic MoonSwatch collection. Celebrated for its bold deep blue design, this model pays tribute to the distant ice giant Neptune and stands as a modern collector's favourite.

Crafted from Swatch's innovative Bioceramic material — a unique combination of ceramic and biosourced plastic — the Neptune exudes both durability and sustainability. Its striking navy blue tones, crisp white chronograph hands, and Super-LumiNova® details create a dramatic yet refined look, perfectly echoing the mysterious beauty of the outer solar system.

Our View

The Swatch x Omega MoonSwatch “Mission to Neptune” is arguably the most collectible and instantly recognisable model in the entire MoonSwatch lineup. Its rich blue tones, signature bioceramic case, and Speedmaster-inspired details make it a standout modern classic. A must-have for fans of Omega's space heritage and Swatch's playful innovation.
