

**Omega, Swatch Moonswatch "Mission to Mercury"**  
**£375.00**

Swatch x Omega MoonSwatch “Mission to Mercury” | 42mm | Bioceramic | Full Set | 2024

The Swatch x Omega MoonSwatch “Mission to Mercury” is one of the most understated and elegant models in the MoonSwatch collection. Paying tribute to the smallest planet in our solar system —and the swiftest — this edition channels the sleek, metallic aesthetic of the original OmegaSpeedmaster Moonwatch with a modern, playful twist.

Crafted from Swatch’s signature Bioceramic, the Mission to Mercury pairs a dark grey case with a matching dial and black subdials, capturing the rugged beauty and mystery of the planet closest to the sun. It’s a piece that blends monochromatic sophistication with cosmic inspiration.

#### Key Features

Condition: New, unworn

Year: 2024

#### Our View

The Mission to Mercury stands out as one of the most refined and versatile MoonSwatch models. Its stealthy grey aesthetic pays homage to the professional look of the Speedmaster Moonwatch while introducing Swatch’s fun and accessible design language.

Understated yet instantly recognisable, this edition offers the perfect entry point into the MoonSwatch universe — ideal for everyday wear or as part of a complete planetary collection.
