

**Rolex Explorer 16570 Black Dial (Services x 4 Complete full set 2001)
£6,400.00**

Watch: Rolex Explorer 16570 Black Dial
Stock Number: CHW6700
Price: £6400.00

This may not be the cheapest example of a classic Rolex Explorer 16570 black dial from the early 2000's, however, it must be one of the best maintained. With lots of Rolex paperwork from various services over the years (at least 4). Box, papers, swing tag, full length bracelet, manuals and calendar make up the set.

Last serviced by Rolex in 2016 (documented), in addition, we have also serviced the watch in late 2025 meaning it runs at just 4 seconds per day with a healthy amplitude of 287. Pressure tested and waterproof to 100 meters too.

In terms of condition we have chosen to leave unpolished but it can be polished upon request (2 or 3 days), this does mean the case and bracelet will show marks and scratches however nothing significant. The glass and dial have no imperfections to note and the bezel is in very good condition.

Just one previous owner who purchased March 2002 (K Serial produced in 2001) and continued to service regularly with Rolex over the years.

40mm stainless steel case, black dial, fixed steel bezel with black markings. Oyster bracelet with fold clasp and full links. Operating from a 3185 calibre movement.

In our view in exceptional example, original and worn but mechanically maintained with no expense spared by Rolex. Surely a worthy collectible for the future and for sale at what we think is in excellent price.

Available for International shipping with DHL, next day UK shipping or collection from Mayfair, London.
