

**18ct Moonstone and Diamond Cluster Ring**  
**£2,650.00**

A classic vintage cluster ring crafted in 18ct yellow gold, dating to circa 1970 and made in London, United Kingdom.

The ring is centred with a luminous oval cabochon moonstone, weighing approximately 2.25 carats, displaying a soft adularescent glow with gentle flashes of blue and white. The moonstone is framed by a sparkling surround of natural diamonds totalling approximately 0.70 carats, graded SI clarity, H colour, adding brightness and contrast to the ethereal centre stone.

The cluster is set in a traditional yellow gold mount, characteristic of late 20th-century British jewellery, combining elegant proportions with enduring wearability. Timeless and versatile, this ring works beautifully as a statement piece or an alternative engagement ring.
