

18ct Yellow Gold Sapphire and Diamond Cluster Engagement Ring
Spectrum Antiques
POA

An elegant 18ct yellow gold sapphire and diamond cluster ring, displaying the refined proportions and craftsmanship typical of mid-20th-century London jewellery.

At its centre sits a natural basaltic blue sapphire, weighing approximately 1.00 ct, its rich midnightrtone beautifully complemented by a border of brilliant-cut diamonds totalling around 0.70 ct. The diamonds, graded SI clarity, I colour, are set in platinum-topped white gold, enhancing their brightness and lending the piece its signature contrast of cool sparkle against warm gold.

The open under-gallery allows light to pass freely beneath the stones, emphasising the lively interplay between sapphire and diamond. A timeless design that blends statement presence with enduring sophistication.

Details:
