

**Georgian Iberian Chrysoberyl Ring - Charlotte Sayers**  
**£9,900.00**

An Iberian chrysoberyl ring, circa 1760–1780, of striking oval cluster design. The centre is set with an elongated oval chrysoberyl, surrounded by an arrangement of pavé set, cushion-shaped chrysoberyl stones, their warm honey-green tones enhanced by closed-back, foil-backed settings typical of the period. The stones are mounted in high-carat gold with finely scalloped collets. There is an approximate total of 21.6 carats chrysoberyls. This ring is a rare survivor of Spanish/Portuguese Georgian jewellery.
