

Orfina Gold
£375.00

This vintage Orfina Golden Flame Rocket stands out with its incredibly unique, asymmetrical gold-plated shield case. The watch features a beautiful, naturally patinated silver dial detailed with textured gold-tone hour markers, matching hands, and a convenient date window at the 3 o'clock position. Paired with a classic dark leather strap, it perfectly captures the bold, experimental design era of mid-century Swiss watchmaking.

Because there are no reference numbers to identify the watch on the case or dial, pinpointing its exact production timeline is difficult, and very few of them have ever been sold online, making this an incredibly rare find. Inside, a reliable Calibre 2452 automatic movement eliminates the need for manual winding, making this distinctively shaped timepiece an exceptional conversation starter.
