

Cartier Panthere 1310 W25054P5
£3,900.00

If you are looking to add an absolute heavyweight of style to your wrist, the Cartier Panthère is the way to go. It's easily one of the most recognisable watches on the planet, doubling up as a stunning piece of jewellery that just effortlessly elevates whatever you're wearing.

We've just given this piece a very light, careful polish to clean up any minor surface wear. Our watchmakers are incredibly mindful with Cartiers—they don't grind them down. Instead, they just bring back that brilliant factory shine while keeping the square bezel crisp and the iconic brick-link bracelet looking exactly like it should. The result is a watch that looks stunningly fresh and catches the light beautifully.

Everything about it screams classic Cartier, from the clean off-white dial and crisp Roman numerals to the iconic blued steel hands and that distinct blue cabochon gem crown. This is the 27mm "Medium" case, which hits the absolute sweet spot for a unisex fit—it sits low, wraps perfectly around the wrist, and feels incredibly comfortable.

To make sure it's completely ready for its next chapter, we also just installed a fresh battery. The Swiss quartz movement is running flawlessly, so you can literally strap it on and go.
