#### Working Order

Recently serviced by Cartier in 2024.

Quartz movement running perfectly.

All functions operating exactly as expected.

#### Our View

The Tank Française is one of Cartier's most enduring designs, combining timeless elegance with everyday wearability. This solid gold example elevates that further, offering a more luxurious feel while retaining the clean, architectural lines that define the Tank.

The addition of a recent Cartier service and new strap makes this a particularly attractive option, offering both peace of mind and presentation. A classic Cartier that is equally suited to daily wear or more formal occasions — and one that will never go out of style.
