Tudor Black Bay Chrono – Ref. 79360N – Panda Dial – 41mm – Full Set – 2022

This Tudor Black Bay Chrono 79360N, dated 8/8/2022, is one of the most sought-after modern Tudors — the iconic panda dial variant (white dial with black subdials). With its sporty motorsport-inspired chronograph styling and Tudor's renowned diving heritage, it offers both robustness and vintage appeal in equal measure.

Housed in a 41mm stainless steel case with a slim 14.4mm profile, this watch wears comfortably while retaining its bold character. The fixed tachymeter bezel is designed for timing speed, and the domed sapphire crystal ensures scratch resistance and superb clarity.

At its heart, the watch is powered by Tudor's COSC-certified Calibre MT5813, developed with Breitling. This automatic movement features a column wheel chronograph, vertical clutch, and an impressive 70-hour power reserve, while also being water-resistant to 100 meters.

Our View

Known simply as the "Panda", this Tudor Black Bay Chrono is one of the most in-demand sports chronographs on the market. Its combination of vintage racing design, everyday wearability, and technical robustness makes it an essential piece for both collectors and those looking for a versatile modern chronograph. A true head-turner with investment potential.
