Additional Notes

- No original box or papers
- Estimated production between approximately 2005–2015

Our View

The Santos is one of the most recognisable watch designs in the world, and the 100XL version elevates that legacy with a larger, more contemporary presence. The combination of steel and yellow gold, paired with the iconic Roman dial and cabochon crown, creates a perfect balance of sport and elegance.

This example offers excellent value — a recently serviced, well-kept Santos without the full-set premium, making it ideal for someone looking to enjoy the watch rather than store it. A bold, versatile Cartier that is as relevant today as ever.
