Omega Automatic Bumper 2582-1 – Calibre 351 – 33mm – 1947

A wonderful piece of Omega history, this Omega Automatic Bumper reference 2582-1 dates to 1947 by serial number and represents one of the brand's earliest automatic wristwatch designs. Powered by the iconic Calibre 351 bumper movement, this watch captures the charm and innovation of Omega's pioneering post-war era.

Recently serviced in June 2026, it remains a highly attractive and wearable example of an increasingly sought-after vintage Omega.

Working Order

Recently serviced in June 2026.

Bumper automatic movement winding correctly and running well.

All functions operating exactly as expected.

Supplied with our 12-month mechanical guarantee.

Our View

The early Omega bumper automatics remain some of the most charismatic vintage watches available. Long before the fully rotating rotor became standard, Omega utilised a hammer-wind system that gives these watches a unique feel and personality on the wrist.

This example combines all the ingredients collectors look for: a desirable Calibre 351, original Arabic numeral dial, signed crown and honest ageing throughout. The patina and dial crazing only enhance its authenticity, reminding you that this watch has survived almost 80 years while retaining its original charm.

A superb opportunity to acquire a genuine piece of Omega history from one of the brand's most important eras.
