A very fine Silver (tested European Grade), Graduated, Paste, Half Hinged Bangle. Circa 1890. Continental.
£425.00

This exquisite antique Half-Hinged Bangle dates from circa 1890 and originates from Continental Europe, showcasing the refined craftsmanship of the late Victorian era. Fashioned from a fine Silver Gilt in tested European Grade Silver, the piece carries the characteristic slightly lower silver content traditionally found in continental pieces of this period.

The elegant design features a graduating profile exquisitely set with 19 carefully proportioned paste stones reflecting an Old European Cut style. Each stone rests within a traditional closed-back setting, capturing the authentic aesthetic and charm of late nineteenth-century high jewellery.

For practical wear and added security, the bangle is fitted with a separate safety chain. This wearable piece of history offers a subtle touch of antique sophistication, making it a wonderful addition to any fine antique jewellery collection.
