Rolex Oyster Perpetual 6751 – 31mm – Two-Tone – Circa 1982

A rarely seen and highly attractive Rolex Oyster Perpetual reference 6751, dating to approximately 1982. Combining classic Rolex styling with elegant proportions, this vintage reference features a beautiful 31mm Oyster case, a striking navy blue dial, and a desirable yellow gold fluted bezel.

Unlike many Oyster Perpetual models of the era, the 6751 dispenses with the date function, creating a wonderfully balanced and uncluttered dial that perfectly showcases Rolex's timeless design language.

Our View

Finding a vintage Rolex is not difficult. Finding one in genuinely exceptional condition is a very different matter.

This Oyster Perpetual 6751 stands out thanks to its striking navy dial, elegant two-tone construction and incredible bracelet condition. The absence of a date display gives the watch a particularly clean and symmetrical appearance, making it one of the purest expressions of the Oyster Perpetual design.

The combination of the 31mm case size and timeless styling means it works beautifully as either a ladies' or gentlemen's watch. Original examples in this condition are becoming increasingly difficult to source, particularly with so much of the original character intact.
