

Yellow Gold
£3,500.00

A refined and unusual take on the timeless diamond line design, this 18ct yellow gold bracelet offers a rare warmth and brilliance. Each round brilliant-cut diamond, totalling approximately 3 carats, is securely set within individual rounded box settings that flow seamlessly around the wrist.

The stones are graded around SI1 clarity, giving a bright and lively sparkle while maintaining a classic antique character. Crafted in luxurious yellow gold—a less common choice for diamond line bracelets—this piece is most likely of American origin, combining durability with understated elegance.

Designed with a concealed box clasp and double safety catches, it wears beautifully alone or layered with other antique and contemporary bangles.

Details:

Origin: Likely American

Date: c. 20th century

Material: 18ct yellow gold

Diamond Weight: Approx. 3.00 carats total
