

Omega Constellation Pie Pan Dial
£865.00

Omega Constellation 168.004 – Pie Pan Dial

A charming vintage Omega Constellation 168.004, featuring the iconic and highly recognisable Pie Pan dial design.

The dial is showing its age and is not in the greatest condition, with visible signs of age and wear. However, this gives the watch plenty of character and contributes to its genuine vintage appeal.

Please note that the plexiglass is not an original Omega replacement, and the crown and stem have also been replaced. These points have been reflected in the description and pricing.

The watch is currently functioning well, with the timekeeping operating correctly and the datechanging as it should.

A genuine vintage Omega with plenty of character, ideal for someone who appreciates the charm and individuality of an older timepiece rather than looking for a completely restored example.

Materials	Stainless Steel

Antique ref: 071
