Our View

The Constellation has long been one of Omega's most elegant collections, and this reference perfectly captures the appeal of the era. The champagne dial works beautifully with the yellow gold bezel, creating a refined and timeless look that remains just as stylish today.

What makes this example especially appealing is its originality. It has intentionally been left unpolished, preserving the character and sharpness often lost on heavily refinished watches. Complete with its original papers, box and spare links, this is a wonderful collector's example of a classic ladies' Omega.
