

Georgian Coral Ring - Charlotte Sayers **£880.00**

A charming Georgian five-stone coral line ring, circa 1800–1820, crafted in 9ct gold and set with five graduated coral cabochons in a simple linear arrangement. The warm coral is beautifully complemented by the rich yellow gold, while the finely chased decoration to the half shank adds wonderful detail and character.

A lovely example of early 19th-century Georgian jewellery, with the delicate hand-worked detailing and romantic use of natural coral so characteristic of the period.

Current Ring Size: P

The ring measures 7mm from north to south

Weight: 2.2 grams
