Our View

The Santos-Dumont is arguably the purest expression of the iconic Santos design. Featuring the collection's famous square case, exposed bezel screws, Roman numeral dial and elegant proportions, it offers a more refined and dress-oriented alternative to the sportier Santos de Cartier models.

At just 7.3mm thick, the watch wears beautifully on the wrist and effortlessly slips beneath a shirt cuff. The silver dial and blued hands create the timeless aesthetic that has made the Santos one of the most recognisable luxury watches ever produced.
