

22ct Gold Citrine Lens & Diamond Flash Camera Ring | Italian c.1960s **POA**

A chic ring from the late 1960s, likely Italian, designed with a vintage camera in mind, featuring a faceted citrine, to represent the lens catching the golden hour of the day.

Beside it, three baguette cut diamonds, stacked to one side, flash like light hitting glass, set in softly brushed stepped gold.

Ring size M1/2.
