

## A Pair of Dorrie Nossiter Dress Clips £2,500.00

A pair of Dorrie Nossiter clips with smoky quartz, chalcedony, pink tourmaline & citrine set in silver. Dorrie Nossiter's work is predominantly from the 1930s but her jewellery is closer in style to the Arts & Crafts movement than the Art Deco jewellery being made at that time.

She was a flamboyant figure with a love for champagne. The Arts & Crafts movement was incredibly important for women as, for the first time, their work was given the same platform and recognition as male artists of the time.
