

**Carnelian Drop Earrings | Rock Crystal & Pearl in 18ct Gold | French
c.1910s
POA**

A stunning pair of early 20th century drop earrings, likely French and dating to around 1910, crafted in 18ct gold. Each earring features bright carnelian beads in graduated sizes joined by decorative gold links, and the largest set with a band of finely faceted rock crystal and topped with a seed pearl.

Measuring just over 5.5cm in length and approximately 1.2cm at the widest point, they are lightweight, and as chic today as they were over a century ago.
