This very fine 18 Carat White Gold Oval Opal and Diamond Cluster Ring is a captivating piece of English heritage, dating to circa 1960.

At its heart sits a luminous oval opal, securely held in an 8 claw-set mounting. The stone exhibits a mesmerising play of colour, flashing vivid shades of green, orange, and purple as it catches the light.

Encircling this central gem is a halo of 18 Round Brilliant-Cut Diamonds, adding a classic brilliance that complements the fire of the opal.

As opals are famously elusive to capture fully in still photography, please do not hesitate to contact us if you would like to view a video of this piece in motion.
