

## **18ct Gold Chevron Band | Vintage English Design c.1970s POA**

This vintage 18ct gold band features a distinctive chevron pattern carved around its full circumference - bold, balanced, and full of character.

The gold has a rich, warm tone, and the deeply carved design gives the piece texture without excess.

Likely mid-20th century, it's a solid, beautifully made ring with a strong look that wears well solo or stacked.

There's light vintage wear consistent with age - some softening and patina in the recesses - but the pattern remains crisp and clean.

It's a piece that was clearly made to last, and it still holds that integrity today.

Whether chosen as a wedding band, a signature everyday ring, or a meaningful gift, it brings a subtle sense of design and story to the hand.

Available exclusively at ELTONS, Grays Antique Market, Mayfair, London.
