£2,750.00**

- Platinum
- Oval Cut Tsavorite Green Garnet: 0.46ct approximately
- Brilliant Cut Diamonds: 0.60ct approximately
- Date: London 2008

Q: Is Tsavorite Green Garnet rare?

A: Tsavorite Green Garnet is 1000 times more rare than emerald, and some say it surpasses Emerald in transparency and brilliance, or how much light is reflected from its interior. Tsavorite Green Garnet is so rare, in fact, that gems over 5 carats are almost unheard of, and gemologists believe it may become near-extinct before long.

<b>Origin</b>	British
