£525.00**

- Sapphires
- Diamonds
- 9ct Gold
- date circa 1970
- Length: 1cm/0.39inch
- Total Weight: 1.8gm

Q: Is Sapphire a rock or mineral?

A: Sapphires and Rubies are both gem varieties of the mineral corundum. They have the same chemical composition and structure. Gems generally get their colour because of certain metals or impurities contained in the mineral. The impurities in corundum gems produce the large range of colours found.

Period	1970s
Condition	Excellent
Materials	Gold
Carat for Gold	9 K
Dimensions	Length: 1cm/0.39inch
Diameter	Total Weight 1.8gm
