

Brazilian Emerald Diamond Ring in 18ct White Gold date circa 1960, SHAPIRO & Co since 1979

£5,750.00

Q: When was emerald first discovered?

A: The oldest emeralds are about 2.97 billion years old. The first known emeralds were mined in Egypt around 1500 BC. One of Cleopatra's favourite stones was emerald, and her passion for the stone was well documented. Emeralds were discovered in South America in the 16th century by the Spanish.
